

Better information, better decisions.

ClearOne™ Reports

ClearONE reports are customizable reports used by our clients in several different creative ways:

- ASC license verification
- X-Files™ - our proprietary disciplinary action history and public record database search
- Fannie and Freddie exclusionary lists
- Clearbox Appraiser Profile for active registrants

Clearbox customers use our API, an XML datafeed, to create reports to be attached to appraisal reports or merged with their own data for fraud reports. Some clients are using profile data and background screening information to develop risk scores on the appraiser.

Contact us at sales@clearbox.com for more details on permissible uses.
