

Develop your tools with our data.

API Solution

Clearbox API provides you with all of the tools necessary to develop your own programs using our data.

You can use the Clearbox API output for an appraiser's:

- Personal Profile
- Company Profile
- Licensing Credentials
- Geographical Competency
- Education
- Continuing Education
- Business Specialties & Credentials
- Disciplinary Actions
- And much more...

Clearbox applications are hosted in a co-location facility in a SSAE 16 Type II and CSAE 3416 audited zone. The Network Operations Center (NOC) staff monitors the network 24x7x365, while the network engineers and facility staff are available at any time in the event of an emergency. Its state-of-the-art redundant systems assure power availability, temperature and humidity control and security.

Clearbox applications use proprietary methods to seamlessly integrate multiple data sources such as ASC and State Regulatory data. Clearbox is loaded with the most recent ASC data on a nightly basis. Our State Regulatory data is updated continuously as information is available.
